SUMMARY

Generalist product engineer with 12 years of experience shipping consumer hardware from prototype through mass production. Deep expertise in firmware (FreeRTOS, STM32, embedded Linux) and RF/wireless systems, with hands-on mechanical design (CAD, CNC, 3D printing), custom PCB development, and iOS/web frontend work. Comfortable owning full product stacks—from circuit design and factory bring-up to cloud services and end-user applications.

EDUCATION

- University of California, Berkeley** Berkeley, CA
B.S. Electrical Engineering and Computer Science May 2014

EXPERIENCE

- Independent** San Francisco, CA
Contract Firmware Engineer July 2025 – Present
 - Contract firmware and hardware development, including a custom accelerometer-based data collection device (sensor integration, embedded data logging, and companion tooling).
- Solid Electric Vehicles** San Francisco, CA
Founding Engineer June 2021 – July 2025
 - Owned the full embedded stack across multiple vehicle programs: low-power Bluetooth firmware on Zephyr RTOS, wire harness design/production, iOS companion app, and cloud services.
 - Managed external development of a multi-camera system (Ambarella, 3 cameras, low-power wake, cloud streaming).
 - Built advanced prototype systems—custom lock (mechanical, PCB, firmware, app), fingerprint unlock, radar motion detection.
 - Developed the target market positioning and managed branding/web teams from concept to launch.
- Skip Scooters** San Francisco, CA
Senior Software Engineer January 2019 – June 2021
 - Led firmware for two vehicle platforms (STM32/STM8S and PIC24F), both integrating with Android phones via USB AOA, CAN, UART, and RS485.
 - Inherited and stabilized a legacy codebase—simplified architecture and reduced cellular data usage by 75%.
 - Drove a pricing model change (per-minute to per-mile) that cut support contacts 80% with no revenue loss and higher NPS.
 - Managed vendor hardware/software development; on-site factory build support.
- Essential Products** Palo Alto, CA
Software Engineer November 2017 – October 2018
 - Led firmware for home accessories: FreeRTOS application, sensor/wireless/hardware interface libraries, and signal processing for ultrasonic and 24 GHz radar human presence detection.
 - Managed chip vendor SOW/MSA engagements and contract manufacturer selection and bring-up.
 - Coordinated third-party contractors for electrical (schematic/layout) and mechanical (PD) design.
- Arete Labs (Acquired by Essential)** San Francisco, CA
Co-Founder, Software Engineer August 2016 – November 2017
 - Sole software engineer for a stealth home security startup: firmware (FreeRTOS, sensor fusion, WiFi pairing/provisioning), full iOS app in Swift, and push notification service.
 - Maintained system block diagrams, reviewed all schematics/layouts, and modeled 120 VAC circuits in LTspice.
 - Patents: US20190120471A1, WO2019018317A1
- Nest Labs / Google** Palo Alto, CA
RF Hardware & Software Engineer May 2013 – August 2016
 - RF Hardware Lead for Nest Guard & Sense: integrated LTE, WCDMA, GSM, WiFi, BLE, and Thread radios into Nest Secure; debugged desense issues and drove FCC/UL certification.
 - Led RF validation of Nest Protect alarm propagation over 802.15.4; built a Python automation framework spanning power supplies, VSAs, and spectrum analyzers.
 - Architected Nest's factory RF test system and hired the team to run it.
 - Patent: US10381722B2

PROJECTS

Cozy Home Labs (Matter-connected smart vents) · All Innings (baseball scores app, iOS) · Ride Call (weather-aware cycling alarm, iOS) · Wave Organ (LiDAR theremin, iOS) · SF Housing Development visualization · SF History Guesser · SF Election Results Map · SF Budget Explorer · HN Glance (AI article summaries) · Daily Cals (exercise habit tracker, iOS) · PCEA Monitor (Stanford Medical School)

Details and more at raemonD.com

TOOLS & HANDS-ON EXPERIENCE

Rework/soldering down to 01005 · Oscilloscopes · Network analyzers · Spectrum analyzers · KiCad (schematic & layout) · Fusion 360 (CAD) · DFM for basic injection molding and CNC · FDM, SLA, and SLS 3D printing
